
Section dividers

Section dividers can be helpful to facilitate navigating the printed version of *The FP7 Coach: vehicle to success*. The section dividers are designed to be printed on normal office printers, with common 4-ring binders in mind. They match the section pictograms used throughout *The FP7 Coach: vehicle to success*; one extra divider with a pencil pictogram is added, and can be used to indicate where personal notes (if any) are stored.

Guidance Notes

- Print the section dividers in landscape A4 on normal office paper (80/90 g/m²).
- For endurance, laminate (plasticise) the dividers and cut them to the appropriate size and shape.
- Alternatively, thicker paper can be used (e.g., 200 g/m² assuming your printer can handle this paper thickness).
- The print-out of *The FP7 Coach: vehicle to success* can be put in a 2-ring binder, but given the number of pages a 4-ring binder is recommended. In a 4-ring binder the section dividers can be put in three different positions: the upper two, the two in the middle or the lower two. In this way overlapping of the dividers is avoided to the maximum extent possible.
- Tip: feel free to use the dividers also for your projects, to facilitate navigation through the project documentation.
